Course: Near real-time Natural Disaster Loss Estimation

Lecturers: Prof. Mario Ordaz, Dr. Mario Martina

Date: 02 May – 15 May, 2017

Classroom: 1-16, 1-17@IUSS

Course schedule

Week	Date	Lecture hours	Subject	Tot h
1	02/05/2017	14:30 - 17:30	1. Introduction: scope and background. (M. Martina)	3
	03/05/2017	14.30 - 17:30	2. Basics of risk evaluation (M. Ordaz)	3
	05/05/2017	15:00 - 18:00	3. Basics of disaster insurance and financing (M. Ordaz)	3
2	08/05/2107	10:00 – 13:00 14:30 - 17:30	4. Overview on parametric model structure (M. Martina) 5. Basics of EQ Risk Modelling (M. Ordaz)	6
	09/05/2017	10:00 - 13:00 14.30 - 17:30	6. Near-real Time models for EQ (M. Ordaz) 7. Trigger-based models (M. Martina)	6
	10/05/2017	10:00 - 13:00	8. Project definition and development (M. Ordaz)	3
	11/05/2017	10:00 - 13:00	9. Near-Real Time models for Flood and project development (M. Martina)	3
3	15/05/2017	09:30 – 12:30	10. Project discussion and presentations (M. Ordaz and M. Martina)	3

Course Description

The aim of the course is to an overview of the near real-time models for the loss estimation of natural disasters. The course will be organized into 15 hours of lectures on theory, 6 hours of practical applications and 9 hours of tutorial.

1. Introduction to near real-time loss estimation models
 - 1.1. Basic concepts
 - 1.2. Scope
 - 1.3. Background
2. Overview on the structure of the model
 - 2.1. The requirements for input data
 - 2.2. The hazard module
 - 2.3. The vulnerability module
 - 2.4. The exposure module
 - 2.5. Post-disaster impact analysis
3. Basic definitions and concepts of insurance
 - 3.1. The risk financing and transfer
 - 3.2. Limits and deductibles
 - 3.3. The pure premium
 - 3.4. The criteria for the quotation
4. Disaster financing mechanisms
 - 4.1. Sovereign Disaster Risk Finance
 - 4.2. Cat bonds
 - 4.3. Parametric insurance programs
 - 4.4. The basis risk
5. Trigger based models
 - 5.1. Design criteria
 - 5.2. Consequence database
 - 5.3. Skill assessment
6. Examples of near real-time loss estimation for earthquake
7. Examples of near real-time loss estimation for flood
8. Project definition, development and presentation
